An E&E Publishing Service

EnergyWire -- Wed., January 9, 2013 -- Read the full edition

1. [OIL AND GAS: Shale oil output anchors a record growth in U.S. production](#)

Drawing on growing output from the Bakken and Eagle Ford shale plays, U.S. crude production averaged 6.4 million barrels a day last year, a gain of 800,000 barrels daily over 2011 -- the largest annual increase since the birth of the U.S. oil industry in 1859, the Energy Information Administration said yesterday.

2. [ARCTIC: Interior, Coast Guard launch probes of Shell operations](#)

Two federal agencies have announced separate investigations into Royal Dutch Shell PLC's Arctic operations, a day after the company's drillship Kulluk was successfully pulled off the rocky shores of Alaska's Sitkalidak Island and towed to a port of refuge.

THIS MORNING'S STORIES

3. [ENERGY POLICY: API chief declares 'new energy reality' at start of Obama's second term](#)
4. [KEYSTONE XL: EPA's Jackson questions pipeline's job estimates](#)
5. [LNG: 'Gas-on-gas competition' from exports could drive pricing changes -- report](#)
